

## Early Learning

# Environmental Sustainability Policy

### Overarching Statement

The *Keeping Children Safe Policy* of the Uniting Church in Australia Synod of Victoria and Tasmania (refer to *Reference/sources*) is the overarching whole of church policy to be implemented by individuals and entities involved with or connected to the Uniting Church. All children who are involved in any of the Church’s activities, events or programs have a right to feel and be safe. The Church is committed to provide safe environments where children are cared for, respected, nurtured and sustained.

### Policy Statement

Uniting Early Learning is committed to:

- Supporting children to develop a sense of place, identity and connection to the land, and where possible influencing the community about the same;
- promoting respect for, and an appreciation of, the natural environment among all at the service;
- fostering children’s capacity to understand and respect the natural environment, and the interdependence between people, plants, animals and the land;
- supporting the development of positive attitudes and values in line with sustainable practices;
- ensuring that educators and other staff engage in sustainable practices during the operation of the service.

### Executive Summary

Current research confirms that experiences in the early years help establish lifelong behaviour and values, and this reinforces the need for environmental sustainability education to be included in early childhood programs. It is important for children to understand their place in the world and the role that they can play in protecting the environment. Children should learn to be environmentally responsible and be empowered to make a difference, and this learning should not wait until the ‘formal education’ of primary school.

Children and educators can take an active role in caring for the environment and contributing to a sustainable future, by developing local and meaningful strategies and embed these practices into day-to-day operations (*refer to Attachment 16b*).

Environmental awareness as a platform for ongoing environmental education, will be developed by services and the community, and provide natural and living materials in the environment, to support children to use all of their senses, and experience and understand seasons and life cycles. Considering children’s level of understanding and development, as future caretakers of our environment, educators will encourage positive attitudes and individual and collective responsibility for day-to-day and long term sustainability.

The curriculum will promote environmental education and foster children’s wonder and knowledge about the natural world. With a focus on open-ended play opportunities, science and nature experiences will be integrated into the daily program so that children develop the positive knowledge, skills and values required when understanding and caring for their environment.

Information and resources will be shared with families to create and support environmental awareness and minimise the impact of human activities on environments.

## Current Environmental Context

The Early Childhood Australia *Code of Ethics* (2016) requires early childhood professionals in relation to children to “collaborate with children as global citizens in learning about our shared responsibilities to the environment and humanity”.

Learning Outcome 2 in the *Victorian Early Years Learning and Development Framework* (2016) guides and supports a collaborative approach between professionals, parents and children where, children “are connected with and contribute to their world” and “broaden their understanding of the world in which they live”.

Early childhood professionals in collaboration with families are responsible for scaffolding children’s learning to develop an environmental identity and consciousness. Maximising children’s engagement with the outdoor environment, and integrating access between the indoors and the outdoors, will enable children to actively engage and explore nature and diversify their play experiences. Intentional and planned learning spaces that promote the development of life skills; such as growing and preparing food, waste reduction, minimising consumption and recycling, and use of recycled, reclaimed, improvised, and natural materials will encourage deeper thinking and leverage learning to promote sustainable environmental habits.

Uniting Early Learning also have a responsibility to align service practice with the organisational wide environmental sustainable policy. This will include practices and behaviours that support activities which contribute to environmental sustainability by reducing waste, pollution and greenhouse gases, the ethical purchasing of products and assisting to moderate the impact of climate change. This includes the commitment to use the Reduce, Reuse and Recycle philosophy as a guide to monitor current practices and implement changes. A priority to energy efficient alternatives when considering lighting, building products and design will also be considered.

## Attachment 16a:- Responsibilities relating to the Environmental Sustainability Policy

### National Regulations & Act

AP=Approved Provider

NS=Nominated Supervisor

CS=Certified Supervisor

### Victorian Regulations & Act

L=Licensee

PN=Primary Nominee

N=Nominee

Action	Approved Provider/ Licensee	NS & PN	CS, N and Educators	Parents
Collaboration occurs between the Approved Provider/Licensee Nominated Supervisor/Primary Nominee, educators, staff, parents, children and others at the service to identify environmental sustainability strategies for implementation ( <i>refer to Attachment 16b</i> )	x	x	x	x
Allocate the necessary resources to implement the identified environmental sustainability strategies at the service	x			
Ensure the Nominated Supervisor/Primary Nominee and all staff are aware of their responsibilities under this policy	x			
Ensure the identified strategies ( <i>refer to Attachment 16b</i> ) are implemented at the service	x			
Ensure parents are aware of and have access to this Policy	x			
Implement identified strategies for which you have responsibility at the service ( <i>refer to Attachment 16b</i> )		x	x	
Ensure environmental education and practices are incorporated into the curriculum ( <i>refer to Educational Program and Practice Policy</i> )		x		
Provide families with information about environmentally sustainable practices e.g. through displays, fact sheets and local community resources, and by ensuring that they have access to this policy		x		
Make recommendations to the Approved Provider/Licensee about green and sustainable options for the service, that reflect the guidelines within this policy		x	x	
Seek and apply for grants, where appropriate, to support the implementation of strategies within this policy		x		
Keep up to date with current research, resources and best practice through newsletters, journals and support agencies such as <i>Environmental Education in Early Childhood</i> (EEEC)		x	x	
Connect with local professional organisations/ the community to work collaboratively on sustainable projects		x	x	
Engage in activities that support the service to become more environmentally sustainable (e.g. recycling)			x	
Incorporate environmental education and sustainable practices within the curriculum, including celebrations of environmental awareness e.g. National Tree Day, National Recycling Week, Clean Up Australia Day and Walk to Work Day			x

## Attachment 16b - Strategies for Environmental Sustainability

This checklist can be used to promote discussion and formulate an environmental sustainability policy for the service. Many of these strategies were drawn from Mia Hughes' *Climbing the little green steps: How to promote sustainability within Uniting Early Learning in your local area*. Other strategies can be added to the checklist as required – refer to *Reference/sources* as a starting point for further information. Ensure that responsibility for implementation is allocated to each strategy adopted e.g. Approved Provider/Licensee, Nominated Supervisor/Primary Nominee, educators, parents, children etc. Agreed strategies should form the basis of the service's *Environmental Sustainability Policy*.

Strategy	Adopt (Yes/No)	Responsible for implementation (e.g. Nominated Supervisor/Primary Nominee, educators, etc.)
<b>Data Collection</b>		
Collect baseline data from energy and water bills, and monitor waste collection. Use information gathered to set reduction targets and evaluate whether they have been achieved.		
<b>Green purchasing</b>		
Purchase local products		
Purchase recycled products		
Purchase energy and water efficient products		
Purchase organic produce		
Purchase items with minimal packaging		
Purchase chemical-free, green cleaning products		
Purchase formaldehyde-free paint		
<b>Waste</b>		
Minimise waste from one-use, throwaway products (e.g. paper towels, disposable nappies, wet wipes) by changing behaviours and procedures, and using alternative products. The following are some suggestions.		
<ul style="list-style-type: none"> <li>Replace paper towels with individual cloth towels on a peg located in the bathroom or at each child's locker, and washed each week.</li> </ul>		
<ul style="list-style-type: none"> <li>Install a low energy electric hand dryer.</li> </ul>		

DOCUMENT TITLE & NUMBER	ENVIRONMENTAL SUSTAINABILITY POLICY

			Policy No. 016

Each Founding Agency Policy, Procedure, Practice Manual or Form continues to have effect on and after the Date of Establishment as Uniting to the extent that it is not inconsistent with a Uniting Level 1 & 2 Policy and until such time as Uniting replaces it.

The latest version of this policy can be found at <https://vtuniting.sharepoint.com/Uniting%20Policies>

● Cut paper towels in half to reduce waste while working towards using cloth towels or installing a low energy electric hand dryer.		
● Replace disposable nappies with a nappy wash service.		
● Replace wet wipes with washable cloths.		
Encourage children to bring a rubbish-free lunch/snack in a reusable container.		
Adopt green cleaning practices by using safe and sustainable cleaning products and methods.		
Recycle plastic waste (codes #1–#7), glass, paper, cardboard, foil and metal.		
Investigate composting of food scraps.		
Explore the waste hierarchy of refuse within the educational program i.e. reduce, reuse, repair and recycle.		
Refrain from using food items for children’s play experiences (e.g. rice, pasta, jelly etc.) as this is wasteful of both the food items, and the water and energy used in production.		
Promote recycling and reusing items e.g. through SWAP markets for children’s clothing, toys and books.		
<b>Energy</b>		
Turn off computers and/or screens when not in use.		
Turn off computers and electrical equipment before leaving the building.		
Install and use ceiling fans instead of air conditioning, when appropriate.		
Close doors and windows when heating or air conditioning the building where possible, while maintaining adequate ventilation. Strategies must be developed for indoor-outdoor programs to enable this to occur.		
Turn off fridges that are not in use during extended holiday periods (ensure no food remains and the fridge is cleaned well beforehand).		
Turn lights off when not required. Install light sensors where possible.		

DOCUMENT TITLE & NUMBER		ENVIRONMENTAL SUSTAINABILITY POLICY

*Each Founding Agency Policy, Procedure, Practice Manual or Form continues to have effect on and after the Date of Establishment as Uniting to the extent that it is not inconsistent with a Uniting Level 1 & 2 Policy and until such time as Uniting replaces it.*

The latest version of this policy can be found at <https://vtuniting.sharepoint.com/Uniting%20Policies>

Upgrade old appliances with energy efficient appliances.		
<b>Water</b>		
Install 5,000–20,000 litre water tanks and consider connecting these to toilets.		
Set limits for water use during play, while acknowledging that water play is important and that children need to use water in order to learn how to conserve it.		
Ensure that water from troughs and bowls is reused to water the garden.		
Use grey water (containing low salt/phosphate detergents) to water grass and gardens when children are not in attendance at the service.		
Install water saving taps in children’s bathrooms.		
Install dual flush toilets.		
Place buckets or watering cans next to drink stations to collect excess water.		
<b>Biodiversity</b>		
Grow food crops in vegetable gardens.		
Plant fruit trees.		
Grow a diverse range of plants, and develop children’s understanding of how plant diversity encourages animal diversity.		
Grow indigenous (native) and water-wise plants.		
Water plants in the play space using recycled water where possible. Plants are a precious resource for the planet and should be protected and nurtured.		

DOCUMENT TITLE & NUMBER		ENVIRONMENTAL SUSTAINABILITY POLICY

<b>Transport</b>		
Encourage staff to walk, cycle or catch public transport to work and on excursions, where possible.		
Create prominent, effective spaces for the storage of bikes and prams to promote riding and walking to staff and families.		
<b>Curriculum</b>		
Role-model sustainable practices and behaviours. Actions such as reusing water from a sink and switching off lights when not in use can have a large impact on young children, who are at a formative stage with respect to skills and attitudes.		
Aim to counteract the 'throwaway' mentality that children experience every day in relation to waste.		
Take every opportunity to talk with young children about sustainable practices, and encourage older children to take part in these practices.		
Assign roles such as water, waste and energy monitors to children within the service (consider providing them with badges and charts appropriate to their role). Children are often vigilant at monitoring the behaviour of their peers.		
The curriculum offers many opportunities to explore sustainable issues and practices. The following are some suggestions.		
<ul style="list-style-type: none"> <li>• Create an 'earth hour' each day where no lights/minimal lighting is used e.g. during rest, relaxation or sleep times.</li> </ul>		
<ul style="list-style-type: none"> <li>• Use a range of pictures, books and stories that address environmental sustainability issues.</li> </ul>		
<ul style="list-style-type: none"> <li>• Have waste-free days.</li> </ul>		
<ul style="list-style-type: none"> <li>• Use improvised, recycled and natural materials for program activities.</li> </ul>		
<ul style="list-style-type: none"> <li>• Examine damaged household appliances and explore whether they can be repaired.</li> </ul>		
<ul style="list-style-type: none"> <li>• Play a recycling game to promote an understanding of items that can be recycled.</li> </ul>		
<ul style="list-style-type: none"> <li>• Investigate alternatives to texta pens and liquid paint, such as powder paint and refillable markers or pencils.</li> </ul>

<ul style="list-style-type: none"> <li>Join Environmental Education in Early Childhood (EEEC) for more ideas.</li> </ul>		
Consider establishing a community garden or exploring a bush or beach kindergarten program, where appropriate		
<b>Family and community involvement</b>		
Inform families about this policy and the service's approach to environmental sustainability through information sessions, photo displays and newsletters etc.		
Design a poster outlining the key principles of environmental sustainability, for display in the foyer of the service. This may include a charter of principles and key targets to be achieved.		
Engage with families and/or the broader community on joint community/service projects, such as Earth Hour, World Environment Day and Clean Up Australia Day.
